8.1 Chemical and physical parameters

Generally the target values of the specification are minimum values for the average values (average value > target value). The designated tolerance values (upper limit value and lower limit value) refer to the single pieces and are valid for the complete scope of testing (piece < upper limit value resp. piece > lower limit value).

| Parameter | Unit of measure | Target value | Upper limit value | Lower limit value |
|------------------|-----------------|--------------|-------------------|-------------------|
| Weight per piece | g | 300 | 320 | 290 |
